Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's amendment filed on February 23, 2006 has been entered and made of record.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claims 6 and 10-19 are cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yanai et al. (U.S. Patent No. 5,666,210).

Regarding claim 1, Yanai et al. discloses a receiver controlled method for processing at least one document, said method comprising the steps of:

(a) providing at least one processing step to be performed on said at least one document (col. 12, lines 1-9);

(b) providing at least one document classification (emergency) to be associated with an at least one document processing profile (col. 13, lines 34-43);

(c) providing at least one document subclassification (rank of emergency, col. 13, lines 34-43)

Art Unit: 2625

(d) creating said at least one document processing profile by associating at least one of said at least one processing steps therewith (col. 13, lines 34-48); and

(e) associating each at least one document classification with one of said at least one document processing profile (col. 13, lines 43-48).

Regarding claim 2, Yanai et al. discloses the method of claim 1, wherein said at least one processing step is a predefined step (col. 12, lines 29-34).

Regarding claim 3, Yanai et al. discloses the method of claim 1, wherein said at least one processing step is a step defined by said receiver (col. 12, lines 29-34).

Regarding claim 4, Yanai et al. discloses the method of claim 1, wherein said at least one processing step is storing said document in a memory (col. 12, lines 42-46);

Regarding claims 5 and 9, Yanai et al. discloses the method of claim 1, further comprising the step of assigning an identifier to each said at least one document classification (identifier 1, col. 13, lines 34-43).

Regarding claim 7, Yanai et al. discloses the method of claim 1, further comprising the step of associating said at least one processing step with each said at least one document subclassification (col. 13, lines 43-48).

Regarding claim 8, Yanai et al. discloses the method of claim 1, further comprising the step of assigning an identifier to each said at least one document subclassification (rank of emergency, col. 13, lines 40-48).

2. ***Allowable Subject Matter***

Claims 20-25 are allowed for the reason that the prior art does not teach in claimed combination, a receiver “providing access to at least one document classification identifier to a sender, said sender printing said at least one document classification identifier on a document to be sent as a sent document using a digital scanner and transceiver”.

Claims 26-31 are allowed for the reason that the prior art does not teach in claimed combination, a receiver “providing access to at least one document classification identifier to a sender, said sender printing said at least one document classification identifier on a document to be sent as a sent document using a digital scanner and transceiver” and at the receiver “processing said sent document according to processing steps associated with said at least one document classification identifier”.
